

```
using System;

namespace Kirky
{
    class Program
    {
        static void Main(string[] args)
        {
            Console.WriteLine("Enter two numbers");

            Console.Write("Enter your unang grado: ");
            int b = Convert.ToInt32(Console.ReadLine());
            Console.Write("Enter your ikalawang grado: ");
            int c = Convert.ToInt32(Console.ReadLine());

            int a = b * c;

            Console.WriteLine(a);

            Console.WriteLine("This is C# program");

        }
    }
}
```

A screenshot of a Windows console window with a black background and white text. The window title bar is visible at the top. The text inside the window shows a C# program running. It prompts the user to enter two numbers. The user enters '44' for 'unang grado' and '55' for 'ikalawang grado'. The program then outputs '2420' and 'This is C# program'. At the bottom, it shows the program finished with exit code 0 and prompts the user to press ENTER to exit the console.

```
Enter two numbers
Enter your unang grado: 44
Enter your ikalawang grado: 55
2420
This is C# program

...Program finished with exit code 0
Press ENTER to exit console.
```
